

PULVERIZED COAL BURNER for AMP (Asphalt Mixer Plant)

OIL TO COAL

Demonstration unit of coal burner and combustor which was demonstrated to many AMP (asphalt mixer plant) operator of Indonesia

This picture shows most of the AMP in the world are still using expensive oil as fuel. Do you know you can save as much as 70% if you change the fuel to coal? It's unbelievable, but it's true

This picture shows the AMP plant operating already with coal fuel using Hamada coal burner system and saving as much as 70%.

This system is not only for AMP, but we have already successfully applied the same system to Brick dryer, tile dryer, Kaolin industries, any kind of rocks and powder drying rotary kiln etc. Please contact us for details.
